

What is Amazon G5?

AMAZON G5 is a concentrated powder detergent for carpet cleaning with hot water extraction machines. It has a very powerful cleaning action that gives brilliant results even on the most heavily-soiled carpets.

Key Benefits

- ✓ Multi-faceted cleaning action for comprehensive dirt and spot removal
- ✓ Pleasantly perfumed
- ✓ Has corrosion inhibitors to protect metal pump components
- ✓ Very economical: dilutes as far as 1 in 625
- ✓ Low-foaming, so gives more productive cleaning time and less time emptying the recovery tank
- ✓ Contains only active ingredients, no fillers

How Does It Work?

AMAZON G5 has a multi-faceted cleaning action so that it separates soil from the fibres, disperses solid particles, emulsifies oils, sequesters hard water ions, dissolves water-soluble matter, suspends dirt and saponifies fatty materials. AMAZON G5 contains a blend of premium ingredients, including biodegradable Linear Alcohol Ethoxylate non-ionic surfactants blended with state-of-the-art low-foaming anionic surfactants which rapidly attack dirt and oils so they can be drawn away from the fibres. The buffered alkalinity provided by AMAZON G5 imparts a sustained attack on fatty soils. Sequestering agents are present to bind with hard-water-ions and solid particulate soilage, keeping these soils in suspension. The net result is a cleaning solution that keeps a wide variety of soilage materials dissolved and suspended so they can be extracted out of the carpet by the wet-vacuum recovery process.

Defoamers and low-foaming surfactants are employed to ensure that foam will not accumulate in the recovery tank. This increases productivity by reducing the down-time associated with emptying the recovery tank.

AMAZON G5 is easy on pumps, valves and heater elements because it contains corrosion inhibitors to protect metallic surfaces. It will also not affect plastic or neoprene seals and hoses. It is ideal for use in both truck-mounts and portable extraction machines.

If there is any residue of AMAZON G5 left on the carpet fibres, it will dry to a friable, non-oily, crystalline solid that will be collected by the dry-vacuuming that is part of normal maintenance. This means that AMAZON G5 will not contribute to re-soiling and the freshly cleaned carpet will stay cleaner for longer.

For Use On...

AMAZON G5 is suitable for use on all carpets, but it is recommended that wool carpets be neutralised in the final rinse after AMAZON G5 has been used.

Pre-test the AMAZON G5 solution on an inconspicuous area to ensure colour-fastness. This is essential before cleaning upholstery fabrics because alkaline products can cause upholstery fabrics' dyes to run and some cottons to turn yellow.

Technical Data

Properties

COLOUR – Yellow moist powder

ODOUR – Floral perfume

DISSOLUTION – Dissolves easily with some stirring

pH = 11.5 – 12.5 at 1% solution; 10.8 at 1 in 300

FOAM – Low foam height

Dangerous Goods Classification

AMAZON G5 is not classed as Dangerous Goods.

Environmental Care

AMAZON G5 conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. AMAZON G5 is non-flammable and biodegradable. AMAZON G5 containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

Portable machines – for each 25 litres of hot water use:

- 40 grams (¼ cup) AMAZON G5 for light soil (1 scoop)
- 80 grams (½ cup) AMAZON G5 for medium soil (1.75 scoops)
- 160 grams (1 cup) AMAZON G5 for heavy soil (3.5 scoops)

This is from 1 l in 625 to 1 l in 150). Pre-dissolve all of the powder in the hot water prior to adding the solution to the tank. To do this, measure out the powder and add it to the hot water. Stir well for 30 seconds. Leave it for 5 minutes, then stir well again. This method will ensure that the powder dissolves completely.

- Truck mounted machines – use 0.4 to 1.67kg (2 ½ to 10 cups) of AMAZON G5 per 25 litre of water. These quantities are intended for machines that dilute this solution to approximately 1 in 10.
- The 10kg pack of AMAZON G5 contains a plastic scoop which holds 70ml. Note that 3 ½ scoops = 1 cup.

Disposal Information

1. Used solutions -

Used Solutions of AMAZON G5 should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. AMAZON G5 containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 1kg, 8kg
