

## What is Amsolve?

AMSOLVE removes carpet stains caused by orange juice, soft drinks, wine, blood, and protein-based foodstuffs such as milk, egg, ice-cream and chocolate. It is also excellent for restoring traffic-soiled synthetic fibre carpets.

### Key Benefits

- ✓ Removes food and protein-based stains
- ✓ Brightens run-down synthetic carpets
- ✓ Biodegradable

### How Does It Work?

Certain types of stains will only dissolve in an alkaline, ammoniated solution. AMSOLVE is the product for this application. It contains ammonia, detergents, builders, and sequestering agents. These ingredients work at the level of nano-particles to dissolve acidic and protein-based soils, thereby removing them from fibres.

### For Use On...

AMSOLVE is a carpet stain remover for hard-to-shift spots and spills caused by orange juice, soft drinks, wine, blood and protein-based foodstuffs such as milk, egg, ice-cream and chocolate.

AMSOLVE is also excellent for rejuvenating heavily traffic-soiled synthetic fibre carpets.

## Technical Data Properties

COLOUR – Transparent water-clear liquid  
ODOUR – Ammonia  
pH = 11.6 – 12.7

### Environmental Care

AMSOLVE conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. AMSOLVE is non-flammable and biodegradable. AMSOLVE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

### Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

## Application

### Carpet Spotting:

- Absorb liquid spillages and scrape up or vacuum solid soilage before applying spotter.
- Apply neat AMSOLVE from a spraygun directly onto the remaining stain or spot. Do not over-wet the carpet. Gently work the AMSOLVE into the stain working from the outside towards the centre. After allowing time to react, blot out the stain with a clean white cloth or paper towel. Alternatively, extract area with extraction detergent solution.
- Always rinse, neutralize or extract after spotting with AMSOLVE. Agar's NEUTRALIZER is good for this.
- Results are always best when spillages are cleaned promptly.

### Carpet Pre-Spraying

- To restore old synthetic carpets such as acrylic, nylon and polyesters, dilute 1 part AMSOLVE with 5-10 parts water and uniformly pre-spray the dirty traffic areas.
- Work in with carpet rake or wand, allow 5 minutes to react then extract with either water or a diluted solution of extraction detergent.

## Disposal Information

### 1. Used solutions -

Used Solutions of AMSOLVE should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

### 2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

Product Code: AMS

Issued: June 16, 2025

### 3. Empty packaging

#### Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. AMSOLVE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

#### Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

**Available in:** 500ml, 5L
