

What is Anti-Static Carpet Spray?

ANTI-STATIC CARPET SPRAY is an easy-to-apply carpet treatment that prevents static electricity from building up in carpet fibres.

Key Benefits

- ✓ Economical & produces excellent result
- ✓ Invisible & does not affect the feel of the carpet
- ✓ Perfumed & pleasant to use

How Does It Work?

ANTI-STATIC CARPET SPRAY is a premium-grade spray-on treatment that prevents static electricity accumulating on carpet fibres. Static electricity may build up on an untreated carpet because of the friction between people's shoes and the carpet fibres. It is especially prevalent when the air humidity is low. The resulting sparks and discharges that occur when the occupant touches a metal surface are both annoying and hazardous, particularly near sensitive electronic equipment. A build-up of static charge also attracts dirt and dust particles from shoes and from the air and thereby contributes to rapid soiling of the carpet.

ANTI-STATIC CARPET SPRAY eliminates all these problems by providing a treatment to the fibres which stops static charge from accumulating. The product has a pleasant perfume, has no tendency to attract dirt, will not change the feel of the carpet and is compatible with most fluorocarbon products. Usually, the treatment with ANTI-STATIC CARPET SPRAY will last 3-6 months or from one cleaning to the next (whichever occurs first).

For Use On...

ANTI-STATIC CARPET SPRAY is effective on all types of synthetic, natural and blended carpet fibres.

Technical Data

Composition

A blend of organic salts, surface active agents and perfume in a water-base. Non-hazardous.

Properties

COLOUR – Transparent, colourless liquid
ODOUR – Pleasant soft rose fragrance
COVERAGE – 1 litre will treat 30 square metres of carpet (an area of 6m x 5m)

Environmental Care

ANTI-STATIC CARPET SPRAY conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. ANTI-STATIC CARPET SPRAY is non-flammable. ANTI-STATIC CARPET SPRAY containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

Initial treatment:

- On dry carpet – dilute 1 part of ANTI-STATIC CARPET SPRAY to 2 parts with warm water and spray onto dry carpet at the rate of 1 litre per 15 square metres of carpet. For deep pile carpets, apply more solution until it is evenly damp.
- On damp carpets (after extraction cleaning) – use undiluted ANTI-STATIC CARPET SPRAY and spray onto damp carpet at a rate of 1 litre per 30 square metres of carpet.

Subsequent treatments:

- On dry carpet – dilute 1 part ANTI-STATIC CARPET SPRAY to 4 parts with warm water and spray onto dry carpet at the rate of 1 litre per 15 square metres of carpet.
- On damp carpets (after extraction cleaning) – dilute 1 part ANTI-STATIC CARPET SPRAY to 2 parts with water and spray onto damp carpet at the rate of 1 litre per 30 square metres of carpet.
- These dilution and application rates may be varied to suit very thin or very thick carpets, but do not over-wet any carpets.
- For carpets with a strong tendency to create static discharges, a second treatment can be applied, if necessary, when the carpet has dried.

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

Disposal Information

1. Used solutions -

Used Solutions of ANTI-STATIC CARPET SPRAY should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. ANTI-STATIC CARPET SPRAY containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L
