

What is Autobrite?

AUTOBRITE is a unique floor cleaner and restorer which cleans effectively and simultaneously replenishes the floor surface with acrylic polish. It is designed for damp-mopping and autoscrubbing, and will leave the floor clean and ready for buffing to a very high finish. Alternatively, it may be used as a quick action spray-buff solution.

Key Benefits

- ✓ A convenient, two-in-one product that polishes and cleans in one operation
- ✓ If used regularly creates a beautiful, glossy film of floor polish

How Does It Work?

AUTOBRITE removes all types of routine floor soilage. It works in a two-stage cleaning mechanism:

1. Attack of soilage by detergent compounds which emulsify and remove it from the floor.
2. Preferential adherence to the floor by the polish components which form a protective film when the floor dries.

For Use On...

AUTOBRITE is used for cleaning vinyl, timber, terrazzo, quarry and ceramic-tile floors. It is ideal for slow to medium speed buffing but is not intended for ultra-high speed buffing (greater than 1200 rpm).

Technical Data

Properties

AUTOBRITE contains solvents, surfactants, builders and buffers together with polish resins and polyethylene and acrylic polymers.

Properties

COLOUR – Milky off-white liquid
ODOUR – Negligible
pH = 10.6 ± 0.5
FOAM – Low foam level, foam is unstable

Environmental Care

AUTOBRITE conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. AUTOBRITE is non-flammable, phosphate-free and biodegradable. AUTOBRITE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

Damp-mopping and autoscrubbing

- Dilute to 1 in 40-80 parts water. Scrub the floor clean. When it has dried, buff to a high shine with a buffing machine at 200-1200rpm.

Spray-buffing

- Dilute to 1 in 15-50 parts water (depending on soilage level and desired gloss of finish). Spray this solution lightly over a square metre of floor then buff this area till it is dry. Continue with the next area until the whole floor is clean. Finally, dust-mop the floor to collect the dust and dirt left along the edges. Buffing will produce a hard wearing, shiny surface.

Disposal Information

1. Used solutions -

Used Solutions of AUTOBRITE should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. AUTOBRITE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L
