

What is Bonnet Cleaner?

BONNET CLEANER is a premium liquid detergent for cleaning all types of carpet by the rotary bonnet method. It is a fast-reacting cleaner that releases soil quickly from carpet fibres so that they can be absorbed by the bonnet.

Key Benefits

- ✓ Suitable for all carpet types
- ✓ Releases soil quickly
- ✓ Free rinsing
- ✓ Free drying

How Does It Work?

BONNET CLEANER is free-rinsing so as to leave minimal residues on the carpet, and it is fast-drying to enable commercial carpets to return to service soon after being cleaned (usually within one hour). BONNET CLEANER complies with Australian/New Zealand Standard AS/NZS 3733 for carpet cleaning systems. Bonnet cleaning is best suited for lightly to moderately soiled carpets. Heavily soiled areas should be cleaned by hot-water extraction using EXIT or CITRUS EXTRA.

For Use On...

BONNET CLEANER is perfect for cleaning all types of carpet.

Technical Data

Composition

A specially developed formula containing surfactants, sequestrants, solvent and fibre-conditioning agents. BONNET CLEANER is a water-based concentrate. It contains no cationic surfactants or optical brighteners.

Properties

COLOUR – Clear colourless to pale amber liquid
ODOUR – Pleasant spice/floral perfume
FOAM – Moderate

Environmental Care

BONNET CLEANER conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. BONNET CLEANER is non-flammable, phosphate-free and based on biodegradable surfactants. BONNET CLEANER containers will be cleaned and reused if returned to Agar Cleaning Systems, significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

1. Vacuum the carpet first to remove solid soilage.
2. Dilute to 1 in 8 with hot water. Pre-test the solution on an inconspicuous area to make sure the carpet is colour-fast.
3. Either:
 - a. Pre-spray a clean, dry bonnet with the solution; or
 - b. Pre-spray the carpet with the solution (only spray a 6m x 6m area at a time); or
 - c. Soak the bonnet in the solution then squeeze out excess moisture. It must not be dripping wet, or it will over-wet the carpet and splash the skirting boards.
4. Fit the bonnet to a slow-speed rotary machine (150 to 300rpm) and scrub the carpet from side to side working in blocks of 2 metre square area. Keep the bonnet damp but do not overwet the carpet.
5. When the bonnet is soiled, remove it and rinse it clean or replace it with a clean bonnet and continue.
6. Clean around furniture and edges using a hand method.
7. Rake the pile when finished. Do not place any furniture on wet carpet as it may cause stains. Wash and air-dry the bonnets after use.

Tips for Bonnet Cleaning

- Never buff with a dry bonnet as this could damage the carpet,
- Bonnet cleaning relies on starting with a clean bonnet which will absorb the greatest amount of soil.
- Avoid 'heeling' the machine on the carpet.
- Be careful on some cut-pile and coarse loop-pile carpets that the rotary action does not cause pile distortion.

Disposal Information

1. Used solutions -

Used Solutions of BONNET CLEANER should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. BONNET CLEANER containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
