

What is Cap-It-Off?

CAP-IT-OFF is an encapsulation cleaner for use on all types of carpet and washable fabric upholstery. CAP-IT-OFF encapsulates soils so they can be removed by vacuuming when dry.

What is Encapsulation?

Carpet encapsulation is the process where a chemical is worked into the carpet with a mechanical action. The soil is enclosed (encapsulated) in crystals on the carpet fibres which are easily removed from the fibres when vacuuming. The science of encapsulation is the crystalline polymers that are added in addition to the detergents.

Key Benefits

- ✓ Cleverly formulated with specially selected ingredients that dry to a brittle, friable residue so vacuuming removes it easily
- ✓ No rinsing required
- ✓ Fast-drying
- ✓ Pleasant fragrance
- ✓ Prevents rapid resoiling

How Does It Work?

CAP-IT-OFF is a concentrated cleaner that is diluted with water and makes a very high foaming liquid. This liquid is used to scrub the carpet area being treated. The rich foam removes and suspends soilage from the carpet fibres. As the carpet dries, the detergent and soilage dry to a crystalline, brittle residue that is removed easily by dry-vacuuming. It also contains anti-soiling resins to coat and protect the fibres from soil penetration in the future.

For Use On...

CAP-IT-OFF is safe for use on wool, stain resistant nylons and all washable upholstery fabrics. It is ideal for use on busy floors where access for cleaning is limited and it is desirable for the carpet to be dry and returned to service as soon as possible.

Technical Data

Properties

COLOUR – Transparent colourless liquid
 ODOUR – Mild floral fragrance
 pH = 8.0 ± 0.5
 FOAM – Rich, stable lather, dry foam

Environmental Care

CAP-IT-OFF conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. CAP-IT-OFF is non-flammable and biodegradable. It contains no toxic materials. CAP-IT-OFF containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Colour Coding

Product identification is made easy with the Agar Colour Coding system. We have 11 different categories of product that are identified by colour and

number. The product itself has this colour. Also, the colour and number are shown:

1. On the bottle label as supplied.
2. On the matching Dispenser Spray Bottle.
3. On the product chart for Colour Coded Cleaning

This system has benefits of reducing the chance of using the wrong product, making compliance and staff training easy, showing that the correct products are being used and providing information about usage, dilution and first aid.

Product	Code Colour	Code Number	Type
CAP-IT-OFF	Beige	10	Carpet and Spot Cleaners

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 3 30 April 1996 SAI Certificate No.: QEC7358

Application

1. Get some help to lift furniture off the carpet and place it out of the way. Leave heavy objects in place. Put aluminium foil under the legs of furniture to prevent stains from water contact.
2. Erect a 'Cleaning in Progress' sign.
3. Dry vacuum the carpet to remove loose dust and dirt.
4. Make up a solution of CAP-IT-OFF at 1 in 16. This is 1 cup CAP-IT-OFF to 4L of water. Pre-test the solution on an inconspicuous area to ensure that the colours will not run.
5. Add the solution to a pump-up sprayer bottle or the tank of a shampoo machine.
6. Apply the solution lightly so that one litre covers 10-20 square meters of carpet (use a slow-speed rotary scrubbing machine fitted with a nylon brush, bonnet or white pad to scrub the solution into the carpet). The scrubbing action will produce a light foam. Do not over-wet the carpet.
7. When the carpet has dried, dry vacuum the carpet to remove the encapsulated soils.
8. Re-open area to traffic.

Note: Do not mix any other chemical, such as deodorisers, with CAP-IT-OFF as these may spoil the process of encapsulation.

Disposal Information

1. Used solutions -

Used Solutions of CAP-IT-OFF should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. CAP-IT-OFF containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L
