

What is Cure?

CURE is a powerful liquid for removing red and yellow stains caused by food dyes and by urine stains in carpets and other fabrics.

Key Benefits

- ✓ Removes food dye stains
- ✓ Removes urine stains
- ✓ Contains ammonia

How Does It Work?

It is designed to strip food dyes and dissolve urine residues. CURE is intended for use on stains caused by blood, orange juice, fruit juices, cordials, flavoured ice confectionery, ice creams, berry, wine, urine and pet stains.

For Use On...

CURE is a stain remover for use on carpet, fabrics and also hard surfaces.

Technical Data

Properties

COLOUR – Transparent water-clear liquid
ODOUR – Ammonia
pH = 11.9 ± 0.5

Environmental Care

CURE conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. CURE is non-flammable and biodegradable. CURE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

Carpet and Upholstery Stain Removal:

- CURE is a dye remover; it is essential to pre-test this product on an inconspicuous area of the carpet or fabric and ensure the colours are not removed. Leave it on for 5 minutes to make certain.
- When this test is passed satisfactorily, spray CURE onto stains or apply to a white cloth and dab it on.
- Brush gently and leave for 3 to 5 minutes until the colour tends to turn yellow or fade away. Leave it for up to 30 minutes if the reaction is slow.
- Extract with very hot water and flush out five times to remove both the stain and the treatment. Wool fibres should be neutralised with FABRIC SOFTENER & RINSE or white vinegar to pH 5 to 7.
- On urine stains, do not extract with water, but vacuum and blot as much CURE from the carpet as possible then allow to air-dry.
- A steam iron set at the correct temperature may be applied to a cloth over the treated stain to speed up the removal reaction. However, this is not recommended on wool carpets because the fibres may be attacked.

Hard Surfaces:

- Remove as much soil as possible. Use neat CURE to spray the stains. Leave for 5 minutes then rinse with clean water.

Note: This product may cause some removal of strippable acrylic floor finishes, so please avoid spraying CURE onto hard floors.

Disposal Information

1. Used solutions -

Used Solutions of CURE should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

Product Data Sheet

Product Code: CU

Issued: June 16, 2025

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. CURE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 500ml

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
