

What is Kuranda?

KURANDA is a specially formulated environmentally preferable commercial-grade disinfectant that is boosted with a detergent for a powerful cleaning action. It leaves surfaces clean, disinfected and perfumed with a fresh floral fragrance.

Key Benefits

- ✓ Dual action – cleaner and disinfectant
- ✓ Removes the source of bad odours
- ✓ Kills germs to reduce the spread of infection
- ✓ Breaks down dirt and grime and washes it away

How Does It Work?

KURANDA is a fresh, pleasant-scented Commercial Grade Disinfectant with a powerful cleaning action that leaves surfaces disinfected, clean and perfumed with a lingering floral fragrance. It will:

- Attack and break down dirt and grease
- Kill germs and destroy odours
- Create a long-lasting pleasant fragrance

For Use On...

KURANDA is ideal for cleaning floors, walls, benches, tables, desks, touch points, sinks, baths, toilets, tiled areas and fittings.

Technical Data

Composition

KURANDA is a water-based disinfectant containing plant-derived surfactants. It has been formulated for rapid soil attack and minimum residue.

Properties

COLOUR – Green
 ODOUR – Sweet floral type
 pH = 5.5 – 6.5
 FOAM – Moderate
 SHELF LIFE – Minimum 1 year (5°C – 50°C)

DISINFECTANT POWER – Commercial Grade Disinfectant at 1 in 25 dilution.

Environmental Care

KURANDA is the latest in environmentally preferable cleaning chemistry, formulated to provide excellent performance as a disinfectant cleaner for hard surfaces with minimum impact on the environment.

Naturally, KURANDA contains biodegradable ingredients, is phosphate-free, uses renewable plant-derived surfactants, and conforms with all statutory environmental requirements. Using the latest 'environmentally preferable' criteria KURANDA has been formulated with a low Volatile Organic Content. This means that it does not contribute to poor indoor air quality, ozone depletion or photochemical smog.

The technically minded will appreciate that KURANDA does NOT contain any alkyl phenol ethoxylates, phthalates, heavy metals, ozone depleting substances, ammonia, amines, butyl solvents, ethylene glycol ether solvents, chlorine or hydrocarbon solvents.

Colour Coding

Product identification is made easy with the Agar Colour Coding system. We have 11 different categories of product that are identified by colour and number. The product itself has this colour. Also, the colour and number are shown:

1. On the bottle label as supplied.
2. On the matching Dispenser Spray Bottle.
3. On the product chart for Colour Coded Cleaning

This system has benefits of reducing the chance of using the wrong product, making compliance and staff training easy, showing that the correct products are being used and providing information about usage, dilution and first aid.

Product	Code Colour	Code Number	Type
KURANDA	Light Green	3	Disinfectant and Antibacterial Detergents

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 3 30 April 1996 SAI Certificate No.: QEC7358

Application

- WEAR GLOVES: as with any other cleaning product, even those that are neutral, gloves must always be worn where ongoing skin contact is possible.

Cleaning and disinfecting walls, floors, fittings, toilets etc.:

- Dilute to 1 in 25 with water. This is about 1 cup per wringer bucket of water. Prepare fresh solutions daily or as required.

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

Storage

KURANDA is stable for 12 months. Store in the original sealed container and keep out of direct sunlight. Also avoid storing the product in extremes of temperature; try to keep it between 10- and 30-degrees C.

Solutions of KURANDA should be used up within 6 – 8 hours of dilution. After this time, they may begin to lose their effectiveness.

Disposal Information

1. Used solutions -

Used Solutions of KURANDA should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system. Although KURANDA has a low aquatic toxicity, detergents in general are not good for aquatic wildlife.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. KURANDA containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Our cartons contain a minimum of 70% of recycled cardboard and/or paper. Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 1L, 5L & 20L

Dispensing Accessories:

500ml Spray Bottle – Code D03

Trigger 500ml Bottle Plain Blue/White – Code DTR

Hand Pump for 5L Bottle (30ml/Stroke) – Code DHP30

Hand Pump for 20L Drum (30ml/stroke) – Code DHP20

Tap in Cap 5L - Code DTC5

20L Drum Tap – Code DTAP
