

What is Mould-X?

MOULD-X is a mould exterminator for killing mould and mildew. It removes mould stains and dirt from hard surfaces. MOULD-X can be used for both indoor and outdoor areas.

Key Benefits

- ✓ Destroys mould and mildew
- ✓ Removes mould stains, dirt, fats, oils, soap build-up and other soilage

How Does It Work?

MOULD-X contains available chlorine which is present in solution in the form of sodium hypochlorite and hypochlorous acid. Hypochlorous acid is a powerful germ-killing agent which kills mould and mildew. MOULD-X also contains caustic alkali and detergents to provide an excellent cleaning action.

For Use On...

All surfaces not harmed by water and chlorine including walls, ceilings, unpolished tiled floors, baths, showers, glass and porcelain. Effective cleaner for removing mildew, mould and fatty or soapy build-ups from tiles, grouting, baths, basins and shower recesses.

Do not use for cleaning alkali-sensitive polished floors. Can be used on outdoors surfaces including walls, under eaves, roofs, driveways, paths, fences, brick, concrete, sandstone.

Caution...

Do not mix MOULD-X with detergents or other chemicals, especially acids, as this may produce toxic chlorine gas or other poisons.

Pre-test MOULD-X on aluminium surfaces to ensure they are not affected.

Avoid splashing MOULD-X on clothing as it will burn holes in cotton and other fabrics.

MOULD-X is corrosive to the skin – wear protective gloves, clothing and safety glasses as shown in the SDS.

Technical Data

Composition

MOULD-X is a premium blend of grease-cutting surfactants and caustic alkali, together with sodium hypochlorite which attacks mould, mildew and all types of soilage.

Properties

COLOUR – Clear to pale yellow liquid
ODOUR – Chlorine odour
pH = 12.0 – 14.0
FOAM – Moderate to High foam action
AVAILABLE CHLORINE – 5% when packed

Environmental Care

MOULD-X conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. MOULD-X is non-flammable. MOULD-X containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

1. MOULD-X is ready to use. No mixing required.
2. Always pre-test MOULD-X in an inconspicuous place before use to ensure no unwanted reaction occur.
3. Apply MOULD-X via spray, mop or cloth.
4. Scrub with a nylon brush to ensure that MOULD-X gets into all crevices.
5. Leave in contact with the surface for 10 minutes.
6. Rinse thoroughly with clean water and allow to dry.
7. Repeat the process, if necessary, until all staining has been removed.
 - Do not mix with detergents or other chemicals.
 - Do not allow to contact carpets, fabrics or alkali-sensitive surfaces.
 - Observe the Use-by-Date printed on the label. Rotate stock properly so that the older product is used before newer stock.
 - Store below 25°C and away from direct sunlight.

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

Disposal Information

1. Used solutions -

Used Solutions of MOULD-X should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. MOULD-X containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L, 20L
