

What is Scrub 'N' Shine?

SCRUB 'N' SHINE is a powerful detergent for polished floors that has a useful 2 in 1 action: it both cleans the floor and replenishes the surface with hard-wearing polish.

Key Benefits

- ✓ Increases gloss of floors
- ✓ 2 in 1 product that both cleans and polishes
- ✓ Regular use will prolong the life of the film of polish on the floor and maintain a beautiful glossy surface
- ✓ Designed for use with UHS buffers as well as 440-1000rpm machines
- ✓ Saves money by extending time between stripping operations
- ✓ Low foaming
- ✓ Removes scratches

How Does It Work?

SCRUB 'N' SHINE is used to wash the floor clean and simultaneously apply floor polish in the one step. The polish applied helps to replenish the floor's coating of floor polish which is gradually removed by foot traffic. The floor is then buffed and quickly yields a super-glossy shine. The SCRUB 'N' SHINE film is very glossy and has excellent depth. It also resists black-marking and dirt pick-up and prevents powder problems.

For Use On...

All types of polished floors will benefit from application of SCRUB 'N' SHINE, including vinyl, timber, terrazzo, quarry and ceramic tiles. Unsealed floors such as sheet vinyl, Tarkett and rubber will look better and be easier to clean with SCRUB 'N' SHINE.

Technical Data

Properties

COLOUR – Milky white liquid
ODOUR – Faint ammonia odour
pH = 9.5 ± 0.5
POLYMER TYPE – Acrylic

Environmental Care

SCRUB 'N' SHINE conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. SCRUB 'N' SHINE is non-flammable and biodegradable. SCRUB 'N' SHINE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

Autoscrubbing:

Dilute SCRUB 'N' SHINE to between 1 in 80-100 (use stronger rate for floors that are more heavily soiled). Scrub or mop the floor clean. Do not rinse after cleaning. Let dry then buff to a high shine. Any machine can be used.

Damp Mopping:

Dust mop or sweep the floor. Dilute SCRUB 'N' SHINE to between 1 in 40-80. Mop floor clean. Do not rinse after cleaning. Allow to dry then buff to high shine.

Spray-buffing:

Dilute SCRUB 'N' SHINE to between 1 in 15-50. Spray the solution lightly over a square meter of floor then buff this area until it is dry. Continue this process over the whole floor. Finally, dust-mop the floor to collect the dust and dirt left along the edges.

Disposal Information

1. Used solutions -

Used Solutions of SCRUB 'N' SHINE should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

Product Data Sheet

Product Code: SCRUB

Issued: June 18, 2025

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. SCRUB 'N' SHINE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L, 20L

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
