

Product Data Sheet

Product Code: SYM

Issued: June 19, 2025

What is Sympol?

SYMPOL is the centrepiece of the SYMPOL for prolonging the life of the floor polish films on all sealed floors.

Key Benefits

- ✓ Hard Wearing – resists scuffing and scratching and does not take black marks
- ✓ No Polishing
- ✓ No Stripping
- ✓ Saves costs
- ✓ Non-foaming

How Does It Work?

By maintaining a constant film thickness on the floor, SYMPOL eliminates costly stripping and resealing procedures. This is a great advantage in winter when very cold floors make sealer application risky.

The SYMPOL film is very glossy with tremendous depth of shine. It also resists black-marking and dirt pickup and prevents powder problems.

For Use On...

SYMPOL is used to wash the floor clean and simultaneously apply floor polish in the one step. The polish applied helps to replenish the floor's coating of floor polish which is gradually removed by foot traffic. The floor is then buffed and quickly yields a super-glossy shine.

Technical Data

Properties

COLOUR – Milky white liquid
ODOUR – Faint ammonia odour
pH = 9.5 ± 0.5
POLYMER TYPE – Acrylic

Environmental Care

SYMPOL conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. SYMPOL is non-flammable and contains biodegradable surfactants. SYMPOL containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Slip Resistance

SYMPOL passes the Slip Resistance Test under dry conditions as specified in AS/NZS 4586-1999. It gives a mean Dynamic Coefficient of friction of 0.55.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

- After stripping the floor, apply 3 coats of MASTERPIECE (on vinyl) or GRANOSEAL (on stone floors).
- Let dry overnight then buff the floor.
- To clean the floor, mop or scrub using red pads with SYMPOL diluted to 1:100 with water.
- Buff the floor when it is dry.
- Very heavy traffic areas may become worn after a month. These areas should be coated with 2 coats of 3D-GLOSS when the need arises.

Disposal Information

1. Used solutions -

Used Solutions of SYMPOL should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
